August 2022

Dear Friends in Christ,

It will be Christmas before you know it. Time seems to be flying by even though we know it always moves at the same pace. Our task remains the same; get the gospel to every creature.

Not many church members really get the picture. We have been expressing for years the fact that, as bad as we see this country going down morally, the world has progressed further still. I saw things in Germany and France in the later fifties that we are just seeing here this year. One thing is the near-naked bathing suits they are wearing here when they were wearing those in Europe in the fifties. The third-world countries are likewise out front. When we went to Haiti women didn't wear pants as they considered that dress for prostitutes. Now they wear them all over the country. You may ask, "What does that have to do with missions?" It means the world is getting harder to reach. People are tied up more and more with the world. Churches are even caught up in the entertainment business. Lord help us keep our focus on the Word of God and getting it out to the world!

We met a missionary from the Dominican Republic who also has a work with Haitians as there are many in the Dominican Republic. He wants us to come down for a while to work with them. We are seriously considering that as it would be a good opportunity to help them. The missionary doesn't speak Haitian Creole, and I am fluent in the language. Pray with me about this to know God's will in the matter. If the Lord signs in on it, it will be successful.

I want to encourage you to visit our website and check some countries and what their needs are. I have found the average Christian knows little about the world we are assigned to reach. If anyone should know geography it should be God's people. We are the ones sent forth to reach the world.

Keep looking up.

Yours for Jesus' sake,

Bro. Daylon Hicks
